### Urnex Brands Inc

Urnex Brands will present Grindz Grinder Cleaner, the first ever product for cleaning coffee grinding equipment. It is an all-natural and food-safe compound of coffee bean-shaped tablets. Operators can quickly and safely grind the product through their grinders to remove coffee oil and particle residue while also removing coffee odours. There is no need to dismantle the grinder to clean burrs or casings. Extensive US and foreign patent documentation is pending for the product and concept.

### H. D. Sheldon & Co Inc

H. D. Sheldon represents The Broaster Co LLC in Asia. It will showcase Broaster's Genuine Broaster Chicken programme and full line of high capacity pressure frying equipment at FHA.

The programme combines proprietary marinades, batters, seasonings, and coatings with the use of Broaster Co-manufactured pressure frying equipment to produce fresh chicken, potatoes, fish, and other products with uniquely delicious flavour profiles. In addition, the Broaster pressure frying process seals in the natural flavour of foods while sealing out most of the oil, resulting in significantly lower carbohydrates, fewer calories, and less fat than conventionally fried foods.

Broaster's pressure fryers are available separately, or as part of the complete programme in three versatile models: the small footprint, cost-effective Model 1600 (120 pieces of chicken per hour cooking capacity), the space-efficient medium capacity Model 1800 (240 pieces of chicken per hour cooking capacity), and the large-capacity, high-efficiency Model 2400 (330 pieces of chicken per hour cooking capacity). All three models feature solid state controls and Broaster's proven qualities: consistent heat distribution, exceptional durability and unmatched efficiency.
